Store credit terms

This page is the written rule for VoltPath store credit. CX should quote it instead of improvising expiry dates or cash-out exceptions.

When we issue credit

Store credit is issued for trade-ins after inspection, for approved goodwill, and when a rider chooses credit instead of a card refund. The returns policy adds 10 percent extra store credit on that choice.

Expiry and cash-out

VoltPath store credits never expire. We do not redeem store credit for cash, Interac, or a transfer to a different person. The credit lives on the original customer account in Shopify.

Combining with promos

Store credit can be combined with a current site promo unless the promo page says otherwise. It cannot be stacked with a second store-credit grant on the same order without L2 approval.

Lost or missing credit

If a rider says credit is missing, search Zendesk for the original grant. If we find the ticket, Finance can reissue the same amount. If we cannot find the ticket, do not recreate the credit. Escalate to L2.
